Subject: NF VALIDATION

Saint-Denis, the 16th of May 2011

Dear Sir,

Following the positive agreement expressed by the NF VALIDATION technical committee the 12th of May 2011, and in accordance with EN ISO 16140 (2003) standard,

The extension of NF VALIDATION Mark is granted to SOLABIA SAS for the following alternative analysis method :

COMPASS[®] Listeria Agar (detection)

Certified under the certificate n# BKR 23/02 – 11/02, with end of validity 28-Nov.-2014

The scope of the alternative method, initially validated for the detection of *Listeria monocytogenes* in all human food products and production environment samples, is extended to the **detection of *Listeria spp.***

A further letter will mention conclusions and possible reservations made by the technical committee. If reservations are mentioned, I ask you to take them into account without any delay.

Yours faithfully,

Deputy General Manager

Jacques BESLIN
